

Kacper Kapela

Game Designer with nearly a decade of experience working on gameplay systems and player-driven mechanics.

I design and implement systems directly in Unity, focusing on how they actually play - prototyping, testing, iterating, and bringing ideas to a finished, working state. I've worked across disciplines and led small to mid-sized teams, but I'm just as comfortable building things hands-on in-engine.

I care about clarity and systems that are readable, scalable, and support meaningful choices.

EXPERIENCE

Freelance, Indie Game Dev

JUNE 2024 - now

- Working on personal game projects
- Developing ideas from concept to finished, playable builds
- Building projects both solo and in small teams
- Participating in game jams and similar events

Longterm Games, Lead Game Designer

JANUARY 2023 - MAY 2024, projects: **StarKeeper**

- Led design of a story-driven management simulation game
- Designed and prototyped core gameplay systems, including procedural narrative mechanics and a custom story editor
- Defined feature scope, created documentation, and coordinated tasks across the team

Enjoy Studio, Lead Game Designer

JUNE 2021 - DECEMBER 2022 projects: **Space Tail**

- Designed and prototyped gameplay systems for a 2D puzzle-platformer
- Created level design layouts and gameplay scenarios
- Coordinated work between art, programming, and QA teams
- Produced clear design documentation and system breakdowns

Klabater, Game Designer / Narrative Designer

MARCH 2019 - NOVEMBER 2020 projects: **Crossroads Inn**

- Designed gameplay systems and implemented content in engine
- Responsible for co-creating and implementing story mode from start to finish with the help of writers and programmers.

DESIGN SKILLS

Systems design (progression, economy, gameplay loops)

Rapid prototyping (Unity, JS)

Iteration and playtesting

Documentation (GDDs, flowcharts, system breakdowns, Wikis, illustrations)

Narrative design (branching dialogue, quest structures)

TECHNICAL SKILLS

Game engines: Unity, Unreal Engine, GameMaker, CryEngine, Esenthel

Programming Languages: C#, Lua, JavaScript

Version control: Git

Task management: ClickUp, Taiga

ADDITIONAL SKILLS

Fluent in art and motion design tools, including Adobe CC

Simple modeling, rigging and animation in 3ds Max and Blender

LANGUAGES

Polish (native)

English (fluent)

Incuvo, Junior Game Designer / QA Tester

MARCH 2017 - DECEMBER 2017 Projects: **Castle Revenge, Super Hero Fight Club**

- Balanced in-game economy and progression systems
- Supported QA testing and iteration
- Created and implemented 2D character animations

Freelance, 3D Graphic Designer

2013 - 2016

- 3D visualizations based on 2d interior designs.

EDUCATION

Video Games & Virtual Space Design

Silesian University (2016–2018)

New Media

Academy of Art in Szczecin (2013–2016)

Visual Advertisement

Secondary School of Fine Arts in Kraków (2006–2012)
